

J.A. HENCKELS INTERNATIONAL

*F*latware – *Classic Styling and Timeless Designs* *Superior Quality from One of the World's Leading* *Cutlery Manufacturers*

From the makers of the World's Finest Cutlery since 1731 comes the J.A. Henckels International Flatware Collection.

Classic styling, timeless European design and larger, elegant continental size will grace any table with style for many years to come.

Manufactured from the highest quality stainless steel, every piece of the Henckels International Flatware Collection is heavy gauge for maximum strength, added durability and that special feel of quality.

Influenced by our expertise in craftsmanship of fine cutlery, every knife in our collection features a unique handle design for better balance and a comfortable grip. The finely honed extra sharp blade provides superior cutting performance.

*O*ur *Commitment to Quality*

1. Each piece of flatware should feel comfortable in your hand, providing the perfect combination of weight and balance.
2. The pattern design should be clean and detailed. It should also provide continuity from the handle to the bowl of the spoon, blade of the knife or heel of the fork.
3. Each piece of flatware should be ground and polished to a smooth, lustrous finish. Edges must be soft and smooth, but the design should remain sharp and detailed.
4. Beautiful flatware must also be functional. Knives should cut sharply and precisely; forks and spoons large enough to make serving and eating a pleasure, not a chore. Our larger, continental size is more elegant than standard size flatware.
